Note: If the Wheelchair Swing Platform is to be used in an open park or playground installation, we recommend some system of supervision whereby management removes the seat, or secures it to the nearest support, to prevent unsupervised mis-use of the equipment. Additionally, it is recommended that a barrier be placed in front, on the sides and behind the swing so as to establish a use zone that will effectively keep the flow of traffic out of the range of the swing. This measure will help to eliminate an impact injury.
